Junior developer/QA with 2 years of experience working with JavaScript.  
Team-oriented contributor and self-starter who takes the initiative to deliver results.

## TECHNICAL SKILLS

**Expert:** JavaScript, HTML, CSS, Node.JS, Express.JS, PostgreSQL, GitHub

**Intermediate:** C++, Bash, HTML5 Canvas API, Pug, Gulp, Jasmine, Mocha/Chai

**Exposure:** Ember, Sass, Ruby, MySQL, Jenkins, Accessibility(a11y), JIRA, Targetprocess

## EXPERIENCE

### Quality Assurance Engineer - Switchfly

October 2017 - Present

Currently in charge of testing Switchfly's ecommerce travel platform to identify, document and track bugs fixes when new features are added.

- ✓ Performing black box and grey box testing of Switchfly's enterprise Sass platform.
- ✓ Working closely with the engineering team to reproduce bugs and verify fixes.
- ✓ Aligning developer solutions with product manager's expectations and bringing attention to any gaps.
- ✓ Bringing new features into compliance with a11y and UI/UX standards.
- ✓ Creating and executing test plans on TargetProcrosses test management system.

### Web Developer Contract - Estée Lauder Contract

June 2017 - July 2017

Built a social media sharing application to promote Estee Lauder's Bumble and Bumble brand of hair care products.

- ✓ Turned wireframes into a responsively designed web application to work on desktop, handheld and tablet.
- ✓ Worked with product management to make sure the solution was up to Estée Lauders standards.
- ✓ Expanded the reach of the application by adding social media features via Facebooks, Pinterest, and Twitter API's.
- ✓ Built a custom solution for users to upload, resize and crop images using HTML5 Canvas and Vanilla JavaScript.

### Full-stack Developer Internship - ForwardLane

February 2017 - May 2017

Reduced feature defects in ForwardLane's VC-backed enterprise platform and mentored data scientist in software collaboration.

- ✓ Worked on reducing the product backlog bugs.
- ✓ Implemented feedback given during code reviews.
- ✓ Worked with QA on perfecting solutions to bug fixes given different scenarios.
- ✓ Created a new developer environment onboarding process that resulted in a 66% reduction in setup time for new team members.
- ✓ Acted as technical point of contact for the New York data science team in their implementation of both data aggregation and RESTful API reporting services, allowing them to more effectively train the machine learning algorithms at the core of the flagship product.
- ✓ On-boarded the company's New York-based data science team with best practices for GitFlow source control, ticket management in JIRA, and documentation in Confluence which accelerated their successful integration into the wider development team.

### Computer Programming Tutor - CUNY Tutoring Services

October 2014 - December 2015

Empowered struggling students with the support they needed to be successful scholars.

- ✓ My students achieved a 100% pass rate for remedial math, business, algebra, calculus, and programming classes (Java and C++).
- ✓ Performed code reviews on student programming projects and gave feedback on more optimal solutions.
- ✓ Built custom study plans for each student and taught them problem-solving strategies applicable across the breadth of their studies.

## EDUCATION

July 2016 - October 2016

Software Engineer Immersive Program  
*Fullstack Academy of Code, Manhattan, NY*

March 2014 - January 2016

Computer Science Degree  
*Kingsborough Community College, Brooklyn, NY*

2001 - 2006

Civil Engineering - 120 units completed  
*California State University Fullerton, Fullerton, CA*
